[1] The radial runout on the shaft extension end of the 130H3-flange motors is: $\sqrt{0.02} A$

[2] LK is the length of shaft key.

[3] Values in the parentheses are for the motor with brake.

- MS1-R series motors share the same cables as MS1-Z series motors.
- For more information on cables, see section Cable Specifications and Models in the hardware guide of the servo drive.
- Motor with power 50W, the power cables must select the rear outlet model as shown on the right. This is to prevent the mounting flange face from be disturbed by the power cable. For detailed cable model selection, please refer to the servo drive hardware guide.
- Power cable with shielded as standard.
- -T: Flexible cable is optional.
- Encoder cable with shielded as datandard.
